Dukaan Manager

दुकान मैनेजर

Complete user guide — owner and staff

Stock · Labels · Selling · Udhaar · Day close · Reports

Open the app: https://garment-shop-wine.vercel.app

Works on: any Android phone or iPhone (Chrome or Safari), and on a laptop browser. Needs internet.

Demo logins (practice shop "डेमो गारमेंट्स"):
Owner — phone **9000000001**, PIN **123456**
Staff — phone **9000000002**, PIN **654321**

Version 1 (Phases 0–4), October 2026. Screens in this guide are shown in Hindi, the app's default language; every button name is given in Hindi as it appears, with its meaning in English.

Contents

1. Getting started — open, install, log in
2. The screen: header and the five tabs
3. Owner and staff — who can do what
4. First-day setup (owner)
5. A normal day, start to finish
6. Receiving stock — माल आया (and 6b: cancelling a wrong bill)
7. Printing barcode labels
8. Selling — बेचें
9. Discounts, untagged items, returns and exchanges
10. Udhaar — उधार
11. Stock — स्टॉक (item page, correcting stock)
12. 11b. Low stock and orders — कम स्टॉक और ऑर्डर
13. Closing the day — दिन का हिसाब
14. Reports and CSV downloads (owner)
15. Settings (owner): prices, markup, staff
16. How the app keeps your money safe
17. Problems and answers (FAQ)
18. Hindi ↔ English button list
19. Master panel (app manager only)

What this app does

It replaces the paper notebook. You tag every item once when it arrives, scan it when it sells, and the app keeps count of stock, sales, udhaar and cash — no writing.

- **Receive stock:** enter the supplier's bill; the app suggests the selling price and makes a barcode for every size.
- **Print labels:** one sticker per piece with name, size, price and barcode.
- **Sell:** scan the barcode with the phone camera or a scanner gun, tap Cash / UPI / Udhaar. Stock goes down by itself.
- **Udhaar:** who owes how much and since when; record payments; send WhatsApp reminders.
- **Close the day:** count the cash drawer and see if anything is short.
- **Reports (owner):** sales, profit, best and slow items, stock value, Excel downloads.

1. Getting started

Open the app

On the phone, open **Chrome** (Android) or **Safari** (iPhone) and go to **garment-shop-wine.vercel.app**.

Put it on the home screen (do this once)

- **Android / Chrome:** tap the ⋮ menu at the top right → **Add to Home screen** (or **Install app**) → Add.
- **iPhone / Safari:** tap the Share button → **Add to Home Screen** → Add.

A green ₹ icon called **Dukaan** appears. Open the app from that icon from now on — it opens full screen like a normal app.

Log in

1. Type your 10-digit mobile number in **मोबाइल नंबर**.
2. Type your 6-digit PIN in **6 अंकों का PIN**.
3. Tap अंदर जाएँ (Log in).

The owner gives each staff member their number and PIN (see chapter 14). There is no SMS/OTP — nothing to wait for.

Login screen

Change language

The button at the top right switches language: it shows English when the app is in Hindi, and हिंदी when it is in English. Each person's choice is remembered, even on another phone.

Log out

Tap **बाहर निकलें** under your name at the top. Always log out if the phone is shared or lost.

2. The screen: header and the five tabs

Header (green bar at the top)

- Shop name, your name and role (**मालिक** = owner, **स्टाफ** = staff).
- **सेटिंग** — settings (owner only).
- **बाहर निकलें** — log out.
- Language button (English / हिंदी).

Bottom tabs

Tab	Meaning	Use it to…
बेचें	Sell	Scan and sell, returns, discounts, today's sales
स्टॉक	Stock	See what is left of every size; reprint a label
माल आया	Receive	Enter a supplier bill and print labels
उधार	Udhaar	Customer credit, payments, reminders
रिपोर्ट	Reports	Close the day; owner reports and downloads

> Every main job takes 3 taps or fewer. If something needs more, tell the person who set up the app.

The Sell tab (first screen after login)

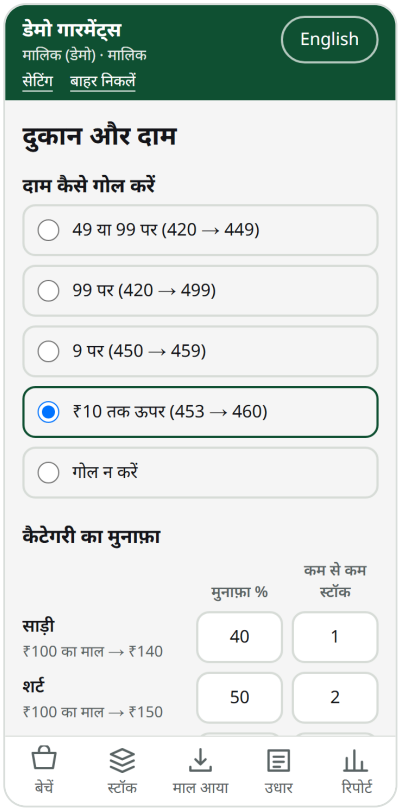

3. Owner and staff — who can do what

Job	Owner	Staff
Sell, scan, take returns and exchanges	✓	✓
Change a selling price	✓ (while entering a bill)	✗ never
Give a discount	✓	only with the owner's PIN
Enter a supplier bill, print labels	✓	✓
See cost price, bill totals, supplier dues	✓	✗
Pay a supplier bill later	✓	✗
Add udhaar customers, record udhaar payments, send reminders	✓	✓
Close the day (count the cash drawer)	✓	✓
Reports: profit, best/slow items, stock value, CSV downloads	✓	✗
Settings: price rounding, markup %, add or switch off staff	✓	✗
Correct a size's stock (count, damaged, lost)	✓	✗
Cancel a wrongly entered supplier bill	✓	✗
See low stock, suggested orders, send order to supplier	✓	✓ (no CSV)
Delete any record	✗	✗

> These rules are enforced by the database on the server, not just hidden on the screen. Even a staff member who knows computers cannot see cost prices or change a price.

4. First-day setup (owner)

Do these once, in this order, before the first real day.

Settings → Shop and prices

Step 1 — Prices and markup

सेटिंग → दुकान और दाम:

- **How to round prices** (**दाम कैसे गोल करें**). Your shop uses **₹10 तक ऊपर**: the suggested price is always rounded *up* to the next ₹10 (₹453 → ₹460).
- **Markup % per category** (**मुनाफ़ा %**). 50% means a ₹300 shirt is suggested at ₹450. The grey line "₹100 का माल → ₹150" shows the effect live.
- **Min stock** (**कम से कम स्टॉक**): sizes at or below this show in yellow on the Stock tab.

Tap सेव करें. See chapter 14 for details.

Step 2 — Add staff

सेटिंग → स्टाफ → name, mobile number, a 6-digit PIN → सेव करें. Tell each person their number and PIN.

Step 3 — Enter the stock already in the shop

Use **माल आया → नया बिल डालें** exactly as for a new bill (chapter 6), with these choices:

- Supplier: choose **+ नया सप्लायर** and name it **"पुराना स्टॉक"** (old stock), or use the real supplier if you know it.
- Payment: choose नकद पूरा दिया (paid in full) so the app does not show money due to anyone.
- Print the labels and stick them on every piece.

> Do it one category at a time (all sarees, then all shirts…). It is the biggest job of the first day, and the most important — every piece needs a label to be scanned later.

Step 4 — Copy udhaar from the notebook

उधार → + नया ग्राहक → name, phone, and under **पुराना उधार (कॉपी से)** the amount and the date it started. See chapter 10.

Step 5 — Tomorrow's opening cash

On the first evening, close the day (chapter 12). The amount you leave in the drawer becomes the next morning's opening cash automatically.

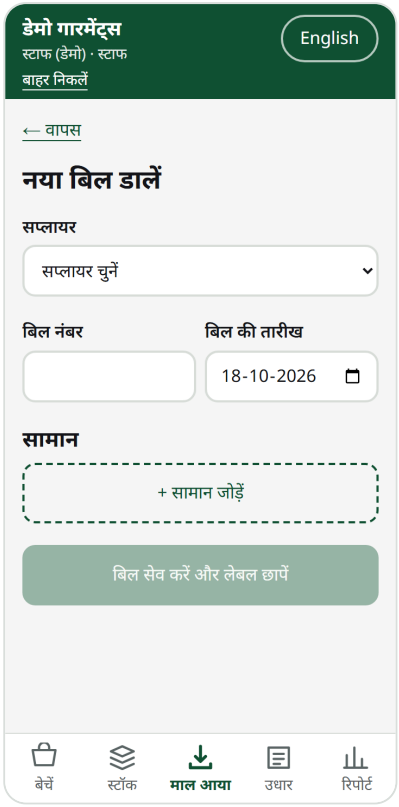

5. A normal day, start to finish

When	What to do	Where
Morning	Open the app, check you are logged in. Plug in / pair the scanner gun if you use one.	—
Stock arrives	Enter the supplier bill, print labels, stick one on every piece **before** putting it on the shelf.	**माल आया**
Customer buys	Scan each item → tap Cash / UPI / Udhaar. Send the WhatsApp slip if the customer wants it.	**बेचें**
Return / exchange	Turn on Return, scan what comes back, turn it off, scan the new item.	**बेचें**
Udhaar customer pays	Open the customer → Money received.	**उधार**
Untagged item	"Item without tag" → category, size, price. Then print a label for it later.	**बेचें**
Evening	Count the cash drawer and close the day.	**रिपोर्ट → आज का हिसाब बंद करें**
Weekly (owner)	Look at Reports: best and slow items, udhaar older than 30 days, stock value. Download the CSVs as your own copy.	**रिपोर्ट, उधार**

6. Receiving stock — माल आया

Start a bill

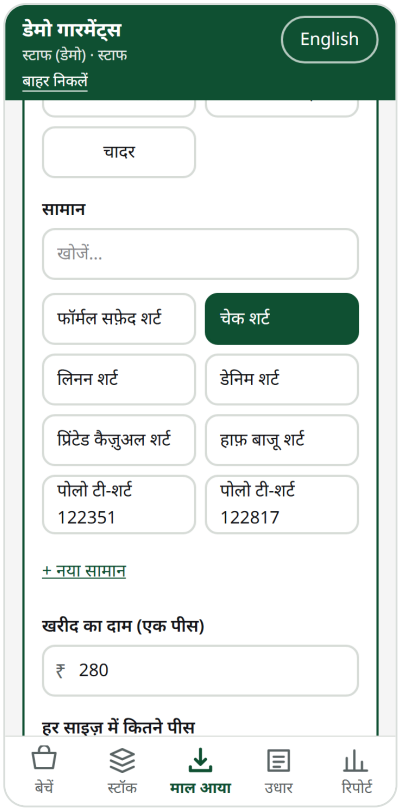

1. Tap the **माल आया** tab → **नया बिल डालें**.
2. **Supplier** (**सप्लायर**): pick from the list, or **+ नया सप्लायर** and type the name (phone optional).
3. **Bill number** and **bill date** from the paper bill (date is today by default).
4. Tap **+ सामान जोड़ें** for each item on the bill.

New bill

Add an item

1. Tap the **category** (साड़ी, शर्ट, बच्चों के कपड़े...).
2. Tap the **item** if it already exists, or **+ नया सामान** and type its name. The second box is the name in the other language (optional) — fill it so the name also shows in English.
3. **Cost price per piece** (**खरीद का दाम (एक पीस)**) from the supplier's bill.
4. **Pieces in each size** (**हर साइज़ में कितने पीस**): type how many of each size came. Leave sizes that didn't come empty. Sarees and bedsheets have one "फ़्री साइज़" box; kidswear shows ages (2-3 साल...).
5. Check the price line, then tap **बिल में जोड़ें**.

Adding an item: category, item, cost

The selling price

- **Staff** see the price only: the current price for an item already in stock, or the **suggested price** (cost + category markup, rounded up to ₹10) for a new item. Staff cannot change it.
- **Owner** sees a price box filled with the current or suggested price, and can type a different one. **यही रखें** puts the suggestion back. A changed price applies to all sizes of that item and is recorded in the price history.

Payment and saving

When all items are added, the bill total shows. Choose how it was paid:

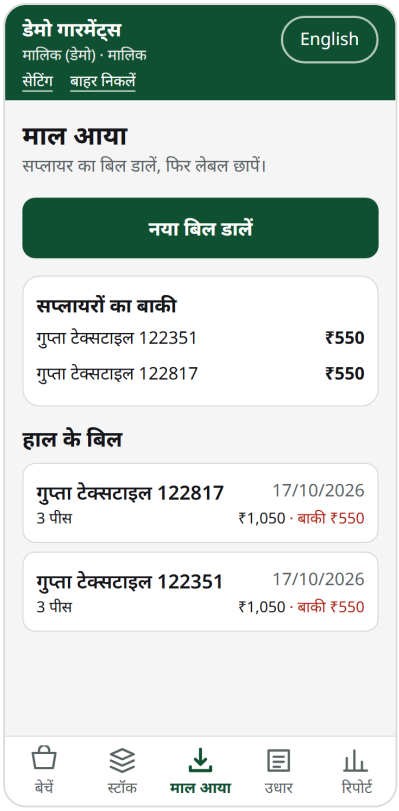

Button	Meaning	Effect
बाद में (खाते में)	Pay later	Whole amount added to what you owe the supplier
नकद पूरा दिया	Paid in full	Nothing due
कुछ दिया	Part paid	Type the amount paid; the rest is due

Tap **बिल सेव करें और लेबल छापें**. The stock goes up straight away and the label page opens (chapter 7).

Bills list and paying a supplier later (owner)

The Receive tab lists recent bills. The owner also sees **सप्लायरों का बाकी** (due to suppliers). To pay: tap the bill → type the amount under **कितना दिया** → भुगतान जोड़ें. Each bill page also has लेबल छापें to print its labels again.

> Staff see bills (supplier, date, pieces) but never the money — no cost, totals or dues.

Owner: dues and bills

Staff: bills only

6b. Cancelling a wrong bill (owner)

If a bill was entered by mistake — entered twice, wrong supplier, wrong quantities — the owner cancels it and enters it again correctly.

1. **माल आया** → tap the bill.
2. At the bottom tap **बिल रद्द करें**.
3. Read the warning, type **why** (**क्यों रद्द कर रहे हैं?**) and tap **हाँ, रद्द करें**.

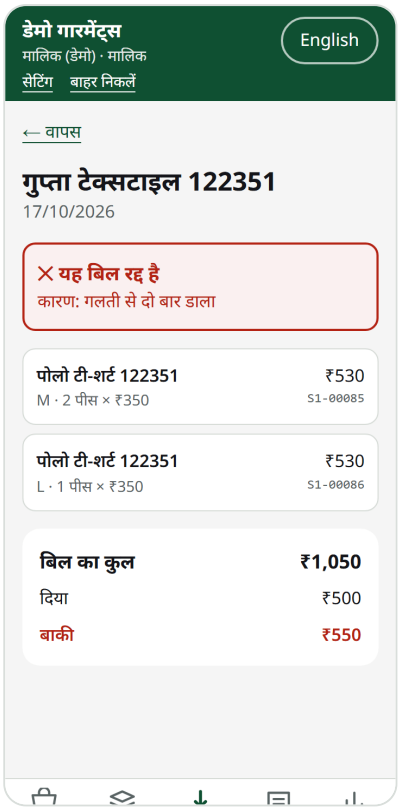

What happens:

- All pieces of that bill come **off the stock**. If some were already sold, the app warns you and those sizes show a minus stock — enter the correct bill to fix them.
- The bill comes **off the supplier's account**. Money already paid on it stays as a credit with that supplier.
- The bill is **not deleted**: it shows ✕ **यह बिल रद्द है** with the reason, and leaves the bills list and supplier dues.

> Labels already printed for a cancelled bill still scan to the same items. When you re-enter the bill for the same items and sizes, the same barcodes are used, so the stickers stay valid.

Cancel a bill, with a reason

A cancelled bill

7. Printing barcode labels

The label page opens after every bill, or from **Stock**: tap any size to reprint its label.

1. Choose the **label size** (**लेबल का साइज़**):
   - **थर्मल रोल 50×25 मिमी** — thermal label printer roll.
   - **A4 शीट – 65 लेबल** — A4 sticker sheet, 65 per sheet (38×21 mm).
   - **A4 शीट – 40 लेबल** — A4 sticker sheet, 40 per sheet (52×30 mm).

   The phone remembers your choice.
2. Check the **copies** (**कॉपी**) for each size with − / +. After a bill it is one label per piece received.
3. For a part-used A4 sheet, type how many stickers are already used in **शीट पर पहले से इस्तेमाल लेबल छोड़ें**; printing starts after them.
4. Tap छापें · कुल N लेबल and choose the printer in the print window.

Each label shows the item name, size, price and a barcode with its code (like **S1-00042**).

Label page

Printing tips

- **A4 sheets** print on any normal printer. In the print window set **Scale 100% / Actual size** and margins **None**.
- **Thermal printer:** easiest from a laptop with the printer's driver installed: open the app in Chrome on the laptop and print. Set paper size 50×25 mm in the printer settings. From a phone, choose "Save as PDF" and print the PDF from the printer's own app.
- Buying a printer: 50×25 mm, 203 dpi, direct thermal, USB (Bluetooth is a bonus). Examples: TSC TE244, TVS LP 46 Neo, Xprinter XP-365B.
- Stick the label where it is easy to scan and won't fold — on the swing tag or the packet.

8. Selling — बेचें

Add items — three ways

1. **Phone camera:** tap कैमरे से स्कैन. The first time, allow camera access. Hold the barcode inside the white box. A beep and a buzz mean it was added. Keep scanning — the camera stays open. Tap **कैमरा बंद करें** when done.
2. **Scanner gun** (USB or Bluetooth): just scan. Nothing needs to be tapped first.
3. **Type the code** printed under the barcode (e.g. S1-00042) in the box and tap जोड़ें. Use this if a label is torn.

Scanning the same item again adds 1 more. Use **−** / **+** on a line to change the number of pieces. Prices cannot be changed.

Get paid

The big number at the bottom (**कुल रकम**) is what the customer pays. Tap one button:

- नकद — cash
- UPI — Google Pay / PhonePe / Paytm etc.
- उधार — on credit (choose the customer — see below)

Check the money is received before tapping. A green screen **✓ बिक्री हो गई** confirms the sale.

Cart with total and payment buttons

Selling on udhaar

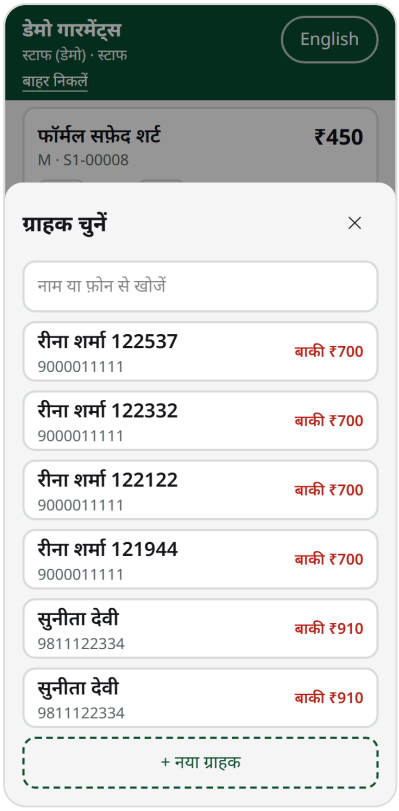

Tap **उधार**. A list of customers opens: search by name or phone and tap the customer, or **+ नया ग्राहक** → name and phone → **उधार पर दें**. The amount is added to what that customer owes.

After the sale

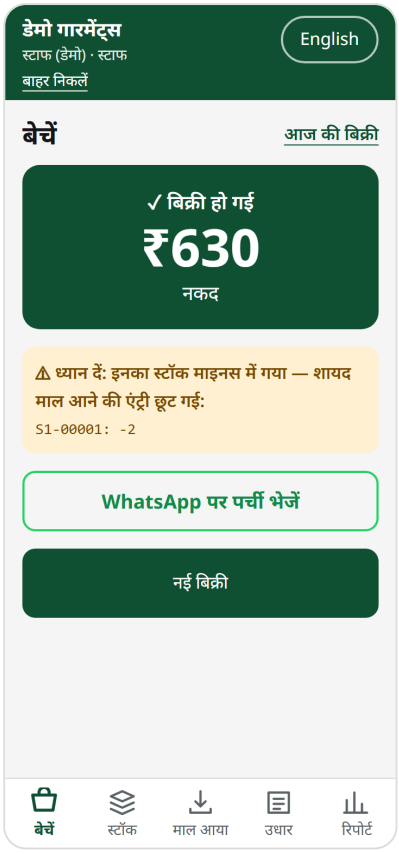

- **WhatsApp पर पर्ची भेजें** opens WhatsApp with a slip (items, total, how paid). For an udhaar customer with a phone it opens their chat directly; otherwise choose the contact.
- Tap **नई बिक्री** for the next customer.
- If you see **⚠ stock went below zero**, the app thought that item was out of stock. The sale is still saved — but tell the owner: probably a receiving entry was missed.

Today's sales

आज की बिक्री (top right of the Sell tab) lists every sale today with time, items, payment, staff name, and totals for cash, UPI and udhaar.

Choose the udhaar customer

Sale done

9. Discounts, untagged items, returns and exchanges

Discount — only with the owner

1. Tap **% छूट दें**.
2. Type the discount in rupees (**छूट ₹ में**) **or** percent (**या % में**). The new total shows.
3. On a staff phone the **owner types their own PIN** in **मालिक का PIN**. The owner's own phone doesn't ask.
4. Tap **लागू करें**, then take payment as usual.

Every discount is saved with who approved it, and shows in the day close and reports.

> **Wrong PIN 5 times in 10 minutes** locks discounts for the whole shop for 10 minutes. This stops anyone guessing the owner's PIN. Selling without discount still works.

छूट हटाएँ removes the discount before payment.

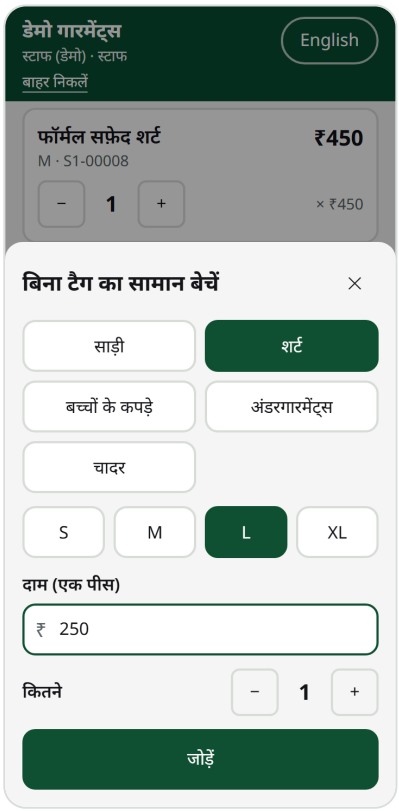

Discount with owner PIN

Item without a tag

For a piece that has no label: **+ बिना टैग वाला सामान** → tap the category → tap the size (optional) → type the price → how many → **जोड़ें**. It is recorded under that category so reports stay right.

> Afterwards, find the item on the Stock tab and print a label for its siblings still on the shelf, so this doesn't happen again.

Item without a tag

Return and exchange

1. Tap ↩ वापसी — it turns red and a line says return is on.
2. Scan the item(s) the customer brings back. They show in red with ↩ **वापस** and a minus amount. Stock goes back up.
3. **Exchange:** tap ↩ वापसी again to turn it off, then scan the new item(s). The total becomes the difference.
4. If the total is **plus**, the customer pays as normal. If it is **minus** (**ग्राहक को वापस**), the buttons change to:
   - नकद वापस — give cash back
   - UPI वापस — send money back by UPI
   - उधार में जमा — reduce what the customer owes (choose the customer)

Returned items are credited at today's price (the shop is fixed-price).

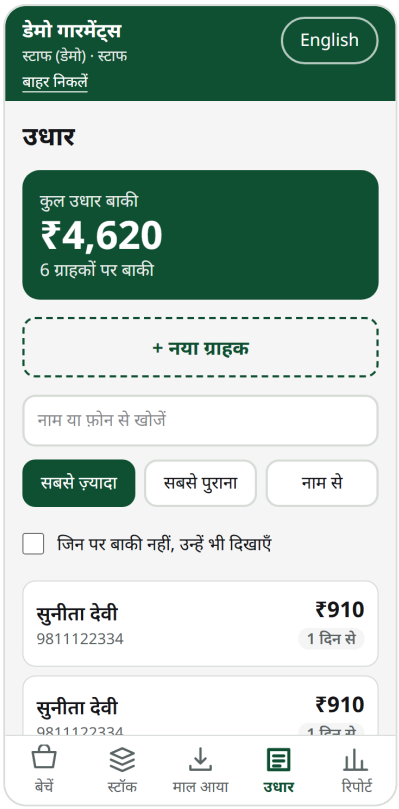

Exchange: one back, one new

10. Udhaar — उधार

The list

- The green box shows the **total udhaar due** and how many customers owe money.
- Sort with सबसे ज़्यादा (owes most), सबसे पुराना (owed longest) or नाम से (by name). Search by name or phone.
- Each customer shows the amount and **since how many days** (X दिन से): normal under 30 days, **yellow 30–59 days**, **red 60 days or more**.
- Customers who owe nothing are hidden; tick **जिन पर बाकी नहीं, उन्हें भी दिखाएँ** to see them.

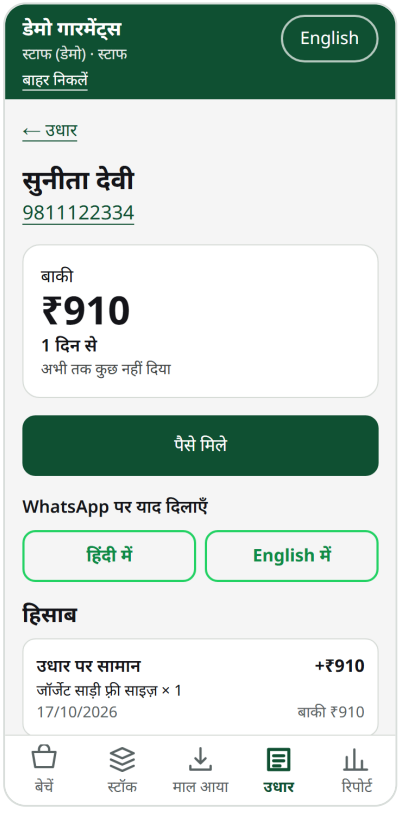

"Since when" counts from the **oldest unpaid** udhaar. Payments clear the oldest amount first, like the notebook.

Udhaar list

Customer page

Tap a customer to see what they owe, since when, the last payment, and the **account** (हिसाब): every udhaar sale with the items bought, every payment and return, and the balance after each.

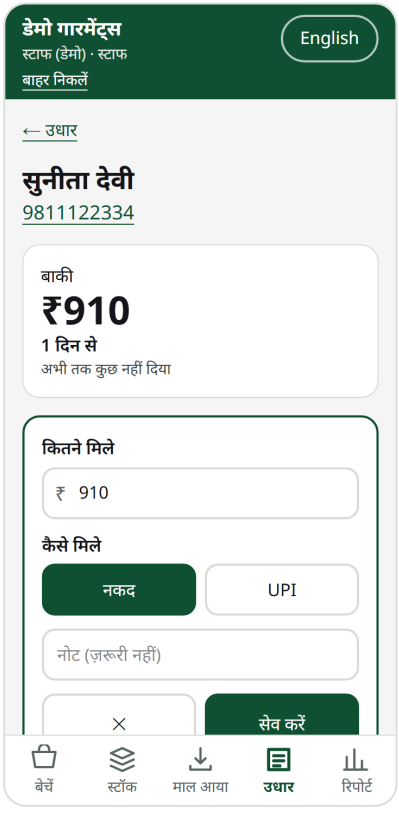

Customer page

Money received

1. Tap पैसे मिले.
2. The full amount is filled in. For a part payment, type the amount received.
3. Tap नकद or UPI, add a note if you like, tap सेव करें.

You cannot enter more than is due. When everything is paid it shows **सब चुकता**.

Money received

WhatsApp reminder

Under **WhatsApp पर याद दिलाएँ** tap (हिंदी में) or (English में). WhatsApp opens the customer's chat with a polite ready message, for example:

> "नमस्ते सुनीता देवी जी, डेमो गारमेंट्स में आपका ₹910 उधार बाकी है। सुविधा अनुसार जल्द भुगतान कर दें। धन्यवाद!"

Check it and press send. The customer needs a phone number; add one with **नाम/फ़ोन बदलें** at the bottom of the page.

New customer and old notebook udhaar

+ नया ग्राहक → name → mobile number (optional) → if they already owe money, under **पुराना उधार (कॉपी से)** type the amount and pick the date it started → (सेव करें). That date is used for "since when".

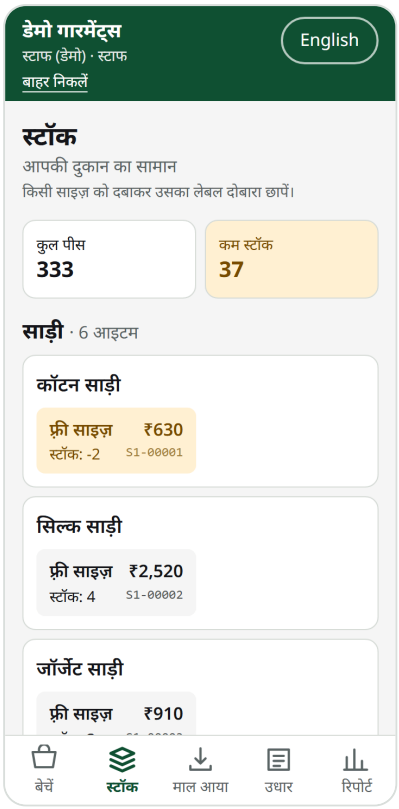

Customers can also be added from the Sell screen while selling on udhaar.

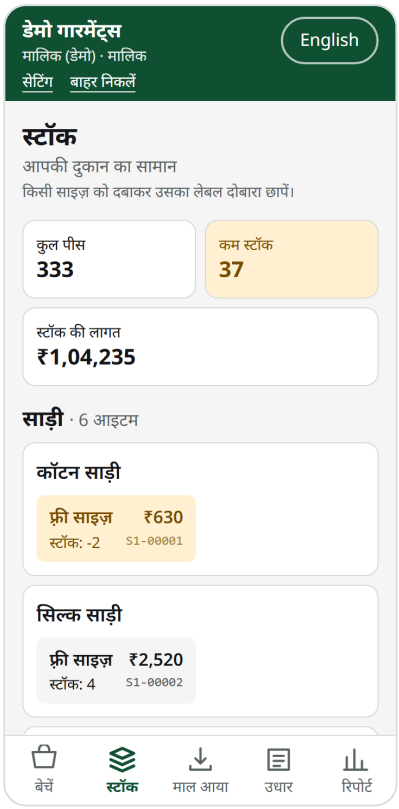

New customer with old udhaar

11. Stock — स्टॉक

- Top: total pieces in the shop and how many sizes are low (**कम स्टॉक**). The owner also sees **stock value at cost**.
- कम स्टॉक और ऑर्डर → opens the reorder screen (chapter 11b).
- Items are grouped by category. Each size shows its price, pieces left and barcode code. **Yellow** sizes are at or below their minimum.
- A **minus** stock means more were sold than were entered as received — check for a missed or cancelled bill.
- **Tap any size** to open its item page.

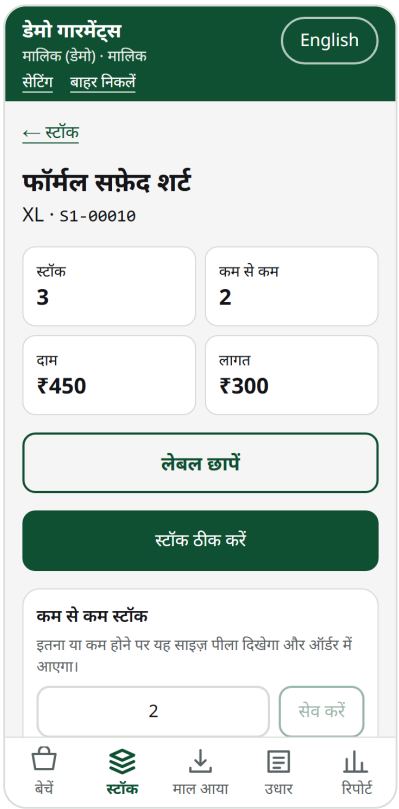

Stock (staff)

Stock (owner sees value)

Item page (one size)

- Stock, minimum, price (owner also sees cost).
- लेबल छापें — print this size's label again.
- **In and out** (**आना-जाना**): every time this size was received, sold, returned by a customer, corrected, or taken off by a cancelled bill — with date and +/− pieces.
- **Owner only:** स्टॉक ठीक करें (correct stock) and the **minimum stock** for this size (**कम से कम स्टॉक** → सेव करें). The minimum decides when the size turns yellow and appears in orders.

Item page (owner)

Correct stock (owner)

Use this after counting the shelf, or when pieces are damaged, lost or sent back to the supplier.

1. On the item page tap **स्टॉक ठीक करें**.
2. Choose **गिनकर कितने हैं** and type the number you counted, **or** **जोड़ें / घटाएँ** and type how many to add (5) or remove (-2).
3. A line like **स्टॉक 5 से 3 हो जाएगा** shows the result before saving.
4. Choose the reason: **गिनती सुधार** (count correction), **खराब / फटा** (damaged), **चोरी / गुम** (stolen/lost), **सप्लायर को वापस** (returned to supplier). Add a note if useful, then **सेव करें**.

Every correction stays in the history with who did it and why. Staff cannot correct stock.

> Once a week, count one category's shelf and correct any differences. After a month every item has been checked.

Correct stock with a reason

11b. Low stock and orders — कम स्टॉक और ऑर्डर

Open it from the Stock tab (कम स्टॉक और ऑर्डर →). Owner and staff can both use it; no money is shown. At the top choose how many days of sales to look at: 14 दिन, 30 दिन or 60 दिन.

Low stock (कम स्टॉक)

Every size at or below its minimum, item by item, shown as **stock/minimum** (e.g. "M: 1/2"). Red means nothing left. Tap a size to open its item page.

What to order (क्या मँगाएँ)

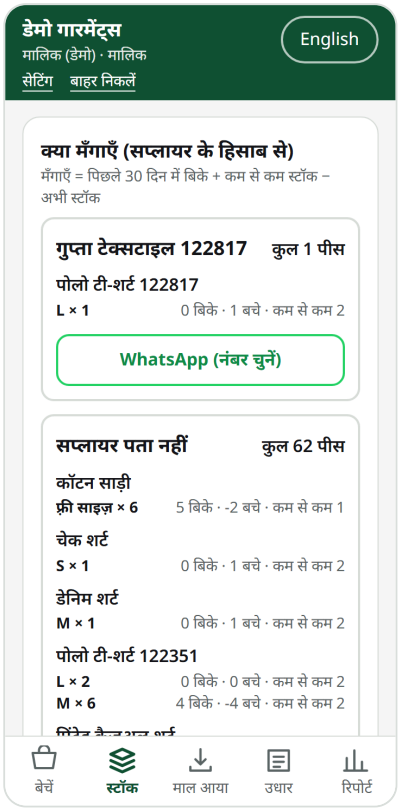

A list for each supplier — the supplier who last sent that size. Each line says how many to order and why:

> **Order = sold in the chosen days + minimum stock − stock now**
> **Example: 4 sold in 30 days, min 2, 1 left → order 5**

- Tap WhatsApp पर भेजें: WhatsApp opens the supplier's chat with the order written out (item, sizes and pieces, total). Check and send. If the supplier has no phone saved, pick the contact yourself.
- Sizes never received on a bill appear under **सप्लायर पता नहीं** (supplier not known).
- Owner: **⬇ ऑर्डर CSV** downloads the full order list.
- It is a suggestion — change quantities in WhatsApp before sending if you know better (season, festival, a size that never sells).

Low stock by size

Suggested order per supplier

Selling fast (तेज़ी से बिकने वाले)

The 10 items that sold most in the chosen days, with stock left and **how many days it will last** at that speed (red if under a week). Order these early.

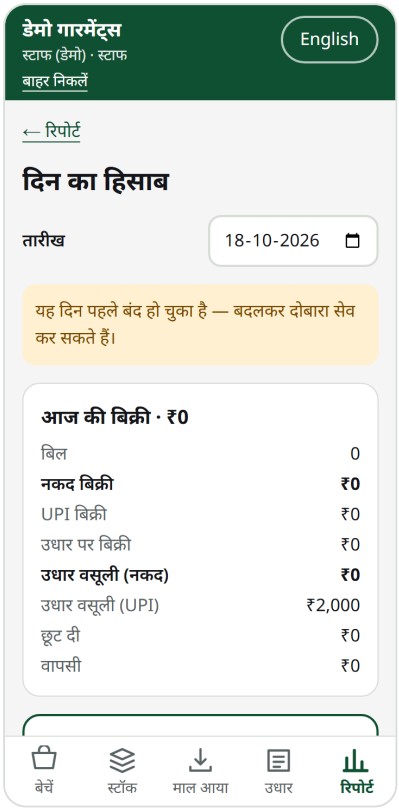

Not selling (जो नहीं बिक रहे)

Items in stock that have not sold for 30, 60 or 90 days (choose), and nothing new of them came in that time either — so fresh arrivals are never listed. Oldest first, up to 25. Consider moving them to the front, a discount, or not re-ordering.

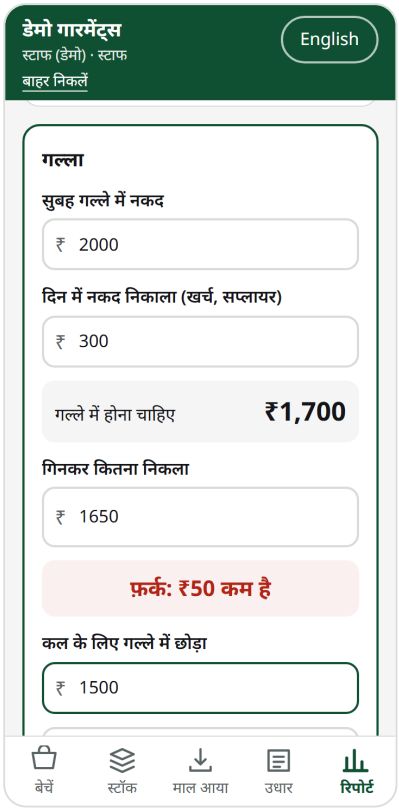

12. Closing the day — दिन का हिसाब

Do this every evening before going home. Owner or staff can do it.

1. **रिपोर्ट** tab → **आज का हिसाब बंद करें →**.
2. Read the day's numbers: bills, cash sales, UPI sales, sold on udhaar, udhaar collected (cash / UPI), discounts and returns.
3. **Cash in the drawer this morning (सुबह गल्ले में नकद)** — filled from yesterday's close; correct it if needed.
4. **Cash taken out today (दिन में नकद निकाला)** — expenses, tea, supplier paid in cash, cash taken home.
5. The app shows **what should be in the drawer (गल्ले में होना चाहिए)**.
6. **Count the drawer** and type it in **गिनकर कितना निकला**. It shows **मिल गया ✓**, or how much is **short (कम है**, red) or **extra (ज़्यादा है)**.
7. **Left in drawer for tomorrow (कल के लिए गल्ले में छोड़ा)** — becomes tomorrow's opening cash.
8. Add a note if something was short, then tap **हिसाब बंद करें**.

The day's numbers

Counting the drawer

Should be in drawer = morning cash + cash sales + udhaar collected in cash − cash taken out
Example: ₹2,000 + ₹0 + ₹0 − ₹300 = ₹1,700. Counted ₹1,650 → ₹50 short.

- Cash sales are already **net of cash refunds**. UPI money is not in the drawer, so it is not counted.
- Closed the day too early? Open it again and save — it updates the same day (**हिसाब दोबारा सेव करें**).
- Pick a past date at the top to see or redo an earlier day. Earlier days are listed at the bottom with their difference.

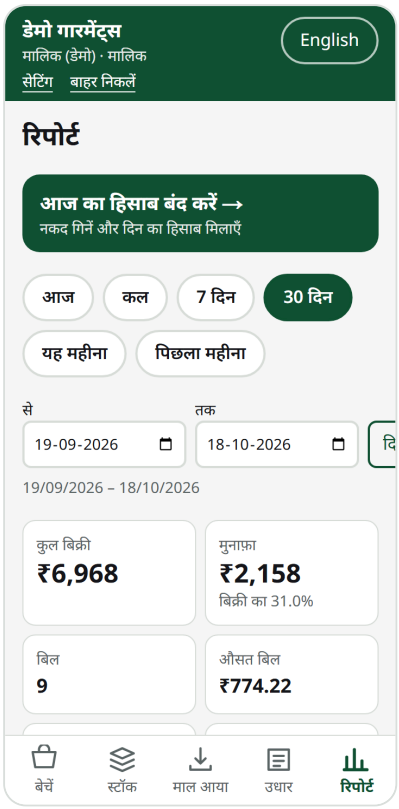

13. Reports and CSV downloads (owner)

Choose the period

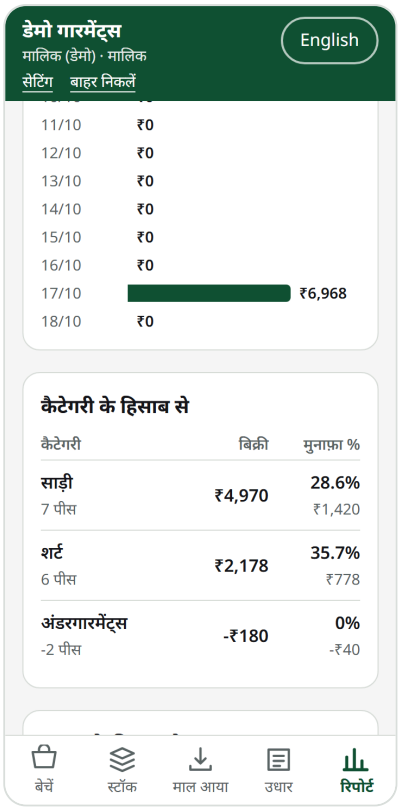

Tap आज today, कल yesterday, 7 दिन, 30 दिन, यह महीना this month, पिछला महीना last month — or pick your own dates and tap दिखाएँ.

Headline numbers

- **Net sales** (**कुल बिक्री**) — after discounts and returns.
- **Margin** (**मुनाफ़ा**) — net sales minus the cost of the pieces sold, and its % of sales.
- Bills, average bill, discounts, returns.

Period and headline numbers

Sales by day and category

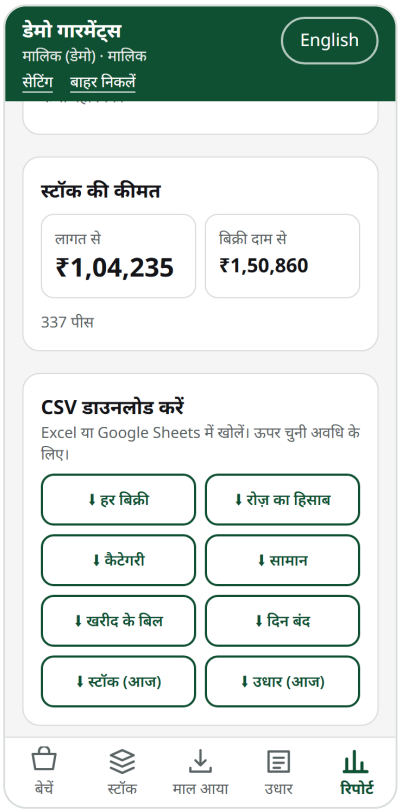

Sections

- **Sales by day** (by week or month for long periods).
- **By category**: sales, pieces and margin % — shows which category earns most.
- **By size**: pieces sold per size — helps decide what sizes to buy.
- **Best sellers** (**सबसे ज़्यादा बिकने वाले**): top 10 items, with stock left.
- **Not selling** (**जो नहीं बिक रहे**): items in stock that did not sell in the period, with the last sale date. Candidates for a clearance offer.
- **Stock value** at cost and at selling price.

Bill discounts are shared over the items on that bill, so margins by category add up to the real money taken.

Best sellers and not selling

Downloads

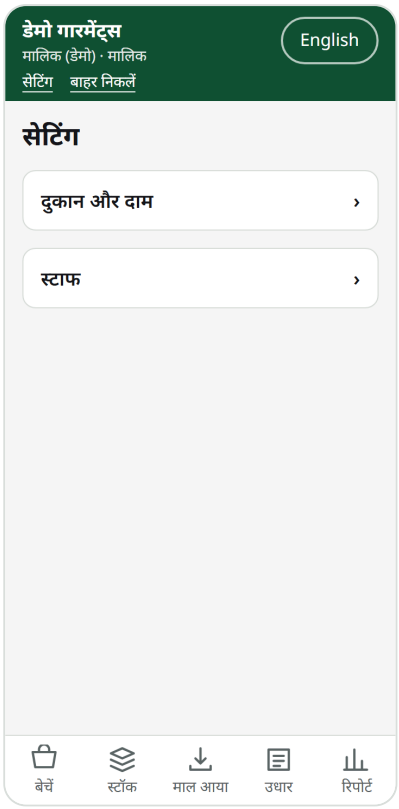

CSV downloads (open in Excel or Google Sheets)

Button	File contains
हर बिक्री	Every item sold: date, time, payment, customer, staff, barcode, item, category, size, pieces, price, discount, cost
रोज़ का हिसाब	One line per day: bills, sales, returns, discounts, net, cost, margin
कैटेगरी	Per category: pieces, net sales, cost, margin, margin %
सामान	Per item: sold, sales, stock now, last sold
खरीद के बिल	Supplier bills: date, supplier, bill no., total, paid, due
दिन बंद	Every day close: sales by mode, expected, counted, difference
स्टॉक (आज)	Every size now: stock, min, price, cost, value
उधार (आज)	Every customer: due, since when, last payment

> Download all eight once a week and keep them in a folder on the laptop or Google Drive. It is your own copy of the shop's records.

14. Settings (owner): prices, markup, staff

Tap **सेटिंग** under your name in the header. Two pages:

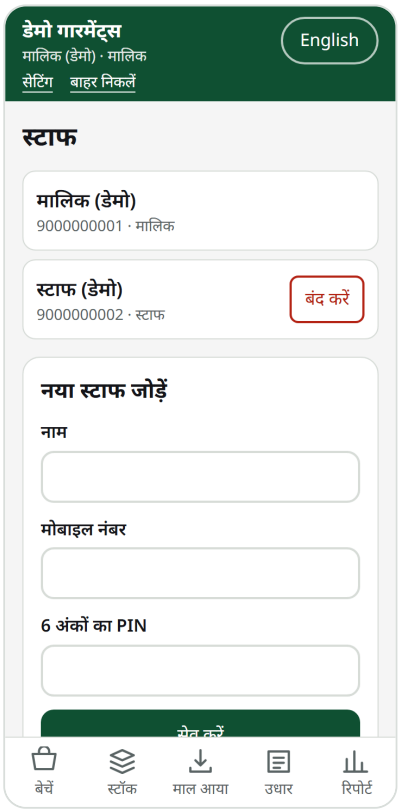

Settings

Shop and prices — दुकान और दाम

Rounding option	Example
₹10 तक ऊपर	453 → 460 (your shop)
49 या 99 पर	420 → 449, 450 → 499
99 पर	420 → 499
9 पर	450 → 459
गोल न करें	exact, next whole rupee

Prices are always rounded **up**, so your profit is never less than the markup you set. Changing the rule or markup only affects **new** items and new sizes; prices already on labels stay the same.

Markup % and **min stock** are set per category. Tap सेव करें.

Staff

Staff — स्टाफ

- **Add:** name, 10-digit mobile number, a 6-digit PIN → सेव करें. Each phone number can have only one account.
- **Switch off** (बंद करें) when someone leaves — they can no longer log in. Their past sales stay in the records. चालू करें switches them back on.
- Choose PINs that are not easy to guess (not 123456, not a birthday). Never tell staff the owner's PIN.

15. How the app keeps your money safe

- **Fixed prices.** The price charged always comes from the shop's records, not from the phone. Staff can't change a price or give a discount without the owner's PIN.
- **Cost prices are secret.** Staff can type a cost while entering a bill but can never see costs, bill totals, supplier dues, margins or reports.
- **Nothing can be deleted.** Not by staff, not by the owner. Mistakes are fixed with a return or a new entry, so the history is always complete.
- **Udhaar balances can't be typed in.** They only change through sales, payments, returns and the opening balance — every change is in the customer's account history.
- **Every discount, price change and day close is recorded** with who did it and when.
- **Separate shops.** If other shops use the app later, no shop can see another's data.
- **Owner PIN lock.** 5 wrong owner PINs in 10 minutes block discounts for 10 minutes.

> Keep your own copy: download the CSV files weekly (chapter 13). Automatic daily backups of the database are not switched on yet.

16. Problems and answers

Problem	What to do
Camera doesn't open / black screen	Allow camera: Chrome ⋮ → Settings → Site settings → Camera → allow for the app. Close other apps using the camera. Use the scanner gun or type the code meanwhile.
Camera doesn't read the barcode	More light, hold the phone 10–15 cm away and steady, barcode flat inside the white box. Creased or faded label? Type the code and reprint the label from Stock.
"यह कोड नहीं मिला" (code not found)	The code was typed wrong, or the item's bill was never entered. Enter the bill (Receive), or use "Item without tag" for now.
Scanner gun does nothing	Make sure no text box is selected (tap an empty area), the gun is charged and paired. Test it in a notes app — it should type the code and press Enter.
"⚠ stock went below zero" after a sale	Not an error — the sale is saved. More pieces were sold than were entered. Check for a missed supplier bill and enter it, or correct the stock (chapter 11).
"मालिक का PIN गलत है" / discounts locked	Wrong owner PIN. After 5 wrong tries wait 10 minutes. The owner can also give the discount from their own phone.
Wrong sale (wrong item or amount)	Sales can't be deleted. Turn on Return, scan the wrong item, scan the right one, and settle the difference.
Wrong supplier bill entered	Owner: open the bill → "बिल रद्द करें" with a reason (chapter 6b), then enter the bill again correctly.
Shelf count doesn't match the app	Owner: Stock → tap the size → "स्टॉक ठीक करें" → counted quantity and reason (chapter 11).
Staff forgot their PIN / owner forgot PIN	The master user (app manager) sets a new PIN in the master panel → the shop → "PIN बदलें" (chapter 18).
WhatsApp opens without a contact	The customer has no phone number. Add it with "नाम/फ़ोन बदलें" on their udhaar page.
Print is too big / small or labels misaligned	In the print window set Scale 100% (Actual size) and Margins None. For thermal, set paper size 50×25 mm in the printer settings.
Something shows "कुछ गड़बड़ हुई" or won't save	Check the internet, then try again. The app needs internet for every save.
App looks old after an update	Pull down to refresh, or close and reopen the app.

17. Hindi ↔ English button list

हिंदी	English	हिंदी	English
अंदर जाएँ	Log in	बाहर निकलें	Log out
बेचें	Sell	स्टॉक	Stock
माल आया	Receive	उधार	Udhaar (credit)
रिपोर्ट	Reports	सेटिंग	Settings
कैमरे से स्कैन	Scan with camera	जोड़ें	Add
↩ वापसी	Return	बिना टैग वाला सामान	Item without tag
छूट दें / छूट हटाएँ	Give / remove discount	मालिक का PIN	Owner's PIN
नकद / UPI / उधार	Cash / UPI / Udhaar	नकद वापस / UPI वापस	Cash back / UPI back
उधार में जमा	Credit to udhaar	नई बिक्री	New sale
WhatsApp पर पर्ची भेजें	Send slip on WhatsApp	आज की बिक्री	Today's sales
नया बिल डालें	Enter new bill	सामान जोड़ें	Add item
खरीद का दाम	Cost price	बेचने का दाम	Selling price
बिल में जोड़ें	Add to bill	बिल सेव करें और लेबल छापें	Save bill and print labels
बाद में (खाते में)	Pay later	नकद पूरा दिया / कुछ दिया	Paid in full / Part paid
लेबल छापें / छापें	Print labels / Print	कॉपी	Copies
पैसे मिले	Money received	याद दिलाएँ	Remind
नया ग्राहक	New customer	पुराना उधार	Old udhaar (notebook)
सबसे ज़्यादा / सबसे पुराना	Most owed / Oldest	सब चुकता	All paid
आज का हिसाब बंद करें	Close today's accounts	गल्ला	Cash drawer
कम है / ज़्यादा है	Short / Extra	मिल गया ✓	Matches
कुल बिक्री / मुनाफ़ा	Net sales / Margin	CSV डाउनलोड करें	Download CSV
दुकान और दाम	Shop and prices	मुनाफ़ा % / कम से कम स्टॉक	Markup % / Min stock
बंद करें / चालू करें	Switch off / on	सेव करें / रद्द करें	Save / Cancel

18. Master panel (app manager only)

The master panel is for the person who runs the app for all shops — not for shop owners or staff. Log in on the normal login page with the **master mobile number and PIN**; the app opens **मास्टर पैनल** (dark blue header) instead of a shop. Only master users can open it; shop owners and staff who try are sent back to their shop. Master users are created only by the app's developer (`npm run admin:create`), never from inside the app.

All shops

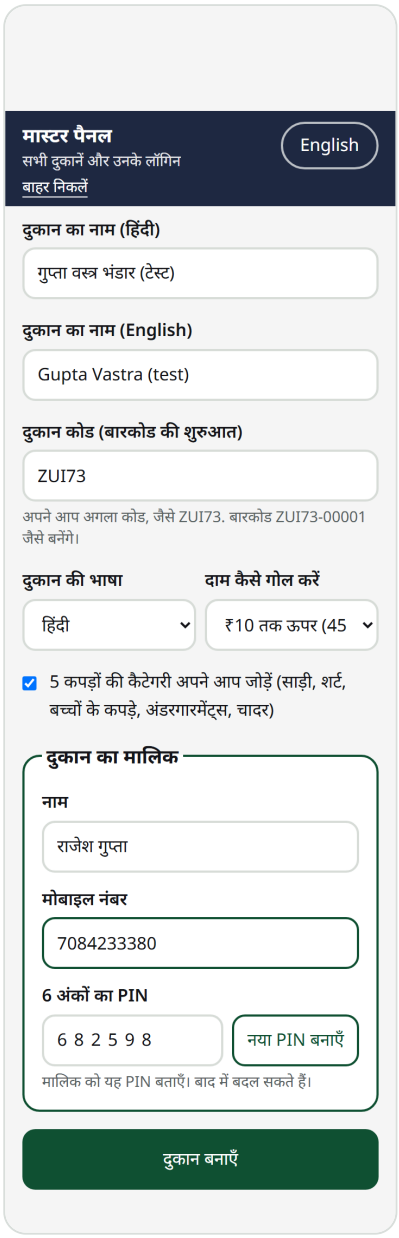

The home page lists every shop with its code, owner name and phone, number of staff, and switched-off logins. Tap a shop to manage it.

Master panel: all shops

Create a new shop

1. Tap **+ नई दुकान**.
2. Shop name in Hindi and/or English.
3. **Shop code** — filled in automatically (S2, S3…). Barcodes of that shop start with it (S2-00001). Leave it unless there is a reason.
4. Shop language and price rounding (**₹10 तक ऊपर** etc.).
5. Keep the tick to add the 5 standard garment categories.
6. **Owner:** name, mobile number and PIN. A random PIN is filled in; **नया PIN बनाएँ** makes another. Note it down.
7. Tap **दुकान बनाएँ**, then tell the owner their number and PIN.

Create a new shop

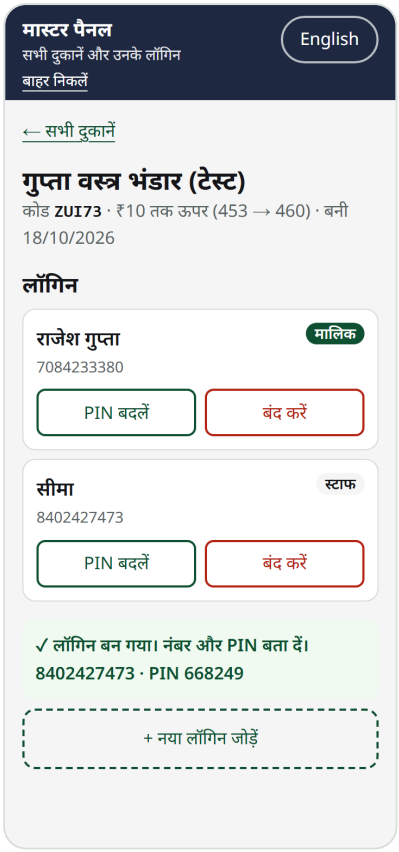

Manage a shop's logins

- + नया लॉगिन जोड़ें — add a **staff** member or another **owner** (choose the role), with name, phone and PIN. The number and PIN are shown once to pass on.
- PIN बदलें — set a new PIN for anyone who forgot theirs. The old PIN stops working at once.
- बंद करें / चालू करें — switch a login off (they can no longer log in; past records stay) or back on.

Every master action is recorded in the shop's audit log.

Rules

- One mobile number = one login. The master number cannot also be a shop login.
- **मेरा मास्टर PIN बदलें** at the bottom of the home page changes your own master PIN. Do it after the first login.
- The master panel does not show any shop's sales, costs or udhaar — only shops and logins.

A shop's logins (example)
